## EXECUTIVE SUMMARY

Argus Insurance Company (Europe) Limited (AICEL or the Company) is domiciled in Gibraltar, and licensed by the Gibraltar Financial Services Commission under the Financial Services (Insurance Companies) Act. It is a wholly owned subsidiary of Argus Group Holdings Limited (Group) based in Bermuda. AICEL offers a broad range of high quality general insurance products to both commercial and individual clients. Our range of products is distributed both directly and through selected intermediaries. The Company underwrites risks in both Gibraltar and Malta.

The purpose of this report is to satisfy the public disclosure requirements of the Financial Services (Insurance Companies) (Solvency II Directive) Act 2015 and to provide a qualitative and quantitative overview of the control environment that the Company operates within, and the methodology used when calculating the solvency margin. The report provides the elements of the disclosure that relate to business performance, governance, risk profile, solvency and capital management.

At Argus, we focus on providing real benefit to our customers by delivering market-leading innovative solutions and high quality service of excellent value. Delivering on our brand promise “**Our Interest is You**” is core to our culture and central to our role as a trusted partner in navigating through everyday challenges and supporting long-term success.

AICEL delivered positive results for the financial year ended March 31, 2020 with gross premiums written of £17.5 million compared to £16.9 million for the year ended March 31, 2019, an increase of £0.6 million or 3.3%. We reported profit before tax for the year of £1.8 million, compared to £0.5 million for the year ended March 31, 2019, an increase of £1.3 million. The Company has exceeded the Solvency Capital Requirements (SCR) and the Minimum Capital Requirements (MCR) throughout the year.

AICEL's focus is to ensure long-term sustainability. We continue to develop strong relationships with key brokers, continue to expand in profitable product lines, focus on client retention and growth, as well as exploring opportunities for product diversification.

AICEL is currently establishing a branch of the entity in Gibraltar in order to continue to underwrite business in Malta post BREXIT. The branch will replace its current Agency in the jurisdiction.

The Solvency II balance sheet and SCR are reported quarterly. The calculation of the SCR has been outsourced to the Group's Actuarial function, and is calculated twice yearly using the Standard Formula model.

The Solvency II balance sheet requires specific valuation rules to be applied, meaning that there are differences between the Solvency II balance sheet and that reported in our Annual Statutory Financial Statements. These differences can be found in Sections 6 and 9.

The table below shows overall net assets on a Statutory Financial Statement (or Statutory) and Solvency II basis:

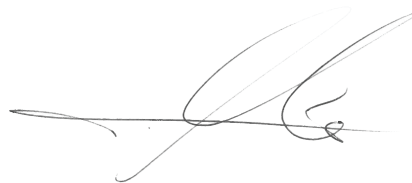

£000	Statutory Accounts	Solvency II
Total Assets	41,936	36,125
Total Liabilities	30,563	26,220
Own Funds	11,373	9,905

The Company has continuously complied with all aspects of the Solvency II regulations from the date of first implementation on January 1, 2016.

## Market Overview

In Gibraltar, where the Company has a large share of the property and casualty market, high retention rates have been maintained on existing business. We continue to develop strong relationships with key brokers, expand in successful product lines such as Contractors All Risks, focus on client retention and growth, as well as explore opportunities for geographical distribution and product diversification.

The outlook for the Malta economy remains strong and opportunities exist to grow the Commercial lines account through developing stronger relationships with our key brokers.

The end of the financial year saw most of Europe in lockdown as a result of the COVID-19 pandemic.

The offices in both jurisdictions were temporarily closed to the public and at one point most of the staff were working remotely. Business continued through very medium possible and saw increased enquiries via Social Media, Web and generic email.

Personal customers continued to transact business via telephone and commercial customers and business introducers continued to do so mainly by email.

In July both offices were opened albeit with restrictions with regards Social Distancing rules.

## 1.2 Underwriting Performance

For the year ended March 31, 2020, the Company reported underwriting income of £1,428,000. The increase of £1,073,000 compared to the prior year was caused primarily by an increase in premiums earned and a decrease in claims expenses during the year. The loss ratio for the Malta operations increased by 4 percentage points compared with the prior year.

Total Underwriting Performance £000	2020 Actual	2019 Actual	Variance	Variance %
<b>UNDERWRITING REVENUES</b>				
Net premiums earned	11,602	11,063	539	5%
Commission, Fees and Other Income	2,016	1,843	173	9%
<b>Total underwriting revenues</b>	<b>13,618</b>	<b>12,906</b>	<b>712</b>	
<b>UNDERWRITING DEDUCTIONS</b>				
Net loss and loss expenses	5,796	6,055	(259)	-4%
Commission expenses	3,946	3,978	(32)	-1%
General and administrative expenses	2,448	2,518	(70)	-3%
<b>Total underwriting deductions</b>	<b>12,190</b>	<b>12,551</b>	<b>(361)</b>	<b>-3%</b>
<b>UNDERWRITING INCOME</b>	<b>1,428</b>	<b>355</b>	<b>1,073</b>	

The following table shows underwriting income for the year ended March 31, 2020 by lines of business.

AICEL Gibraltar & Malta Combined Underwriting Income Report						
Results for the year ended March 31, 2020						
£000	Accident	Motor	Marine	Fire	Liability	Total
<b>UNDERWRITING REVENUES</b>						
Net premiums earned	1,775	7,594	115	271	1,847	11,602
Commission, Fees and Other Income	13	44	104	1,841	14	2,016
<b>Total underwriting revenues</b>	<b>1,788</b>	<b>7,638</b>	<b>219</b>	<b>2,112</b>	<b>1,861</b>	<b>13,618</b>
<b>UNDERWRITING DEDUCTIONS</b>						
Net loss and loss expenses	364	4,787	54	71	520	5,796
Commission expenses	376	2,216	132	773	449	3,946
General and administrative expenses	662	401	21	801	563	2,448
<b>Total underwriting deductions</b>	<b>1,402</b>	<b>7,404</b>	<b>207</b>	<b>1,645</b>	<b>1,532</b>	<b>12,190</b>
<b>UNDERWRITING INCOME</b>	<b>386</b>	<b>234</b>	<b>12</b>	<b>467</b>	<b>329</b>	<b>1,428</b>

The following tables show underwriting income for the year ended March 31, 2020 and 2019 by geographical areas.

Gibraltar Underwriting Performance	2020	2019	Variance	Variance %
£000	Actual	Actual		
<b>UNDERWRITING REVENUES</b>				
Net premiums earned	5,555	5,086	469	9%
Commission, Fees and Other Income	1,411	1,223	188	15%
<b>Total underwriting revenues</b>	<b>6,966</b>	<b>6,309</b>	<b>657</b>	
<b>UNDERWRITING DEDUCTIONS</b>				
Net loss and loss expenses	1,784	2,335	(551)	-24%
Commission expenses	1,081	970	111	11%
General and administrative expenses	2,554	2,364	190	8%
<b>Total underwriting deductions</b>	<b>5,419</b>	<b>5,669</b>	<b>(250)</b>	
<b>UNDERWRITING INCOME</b>	<b>1,547</b>	<b>640</b>	<b>907</b>	

The Gibraltar operations maintained profitability, underwriting income increased to £1,547,000 for the year ended March 31, 2020, compared to £640,000 for the year ended March 31, 2019. Net premiums earned development has been favourable to prior year largely due to favourable movements in accident and liability whilst net claims favourable experience was largely due to improved liability and motor claims experiences. There were no significant changes in products and business performance during the financial year.

Malta Underwriting Performance £000	2020 Actual	2019 Actual	Variance	Variance %
<b>UNDERWRITING REVENUES</b>				
Net premiums earned	6,047	5,977	70	1%
Commission, Fees and Other Income	605	620	(15)	-2%
<b>Total underwriting revenues</b>	<b>6,652</b>	<b>6,597</b>	<b>55</b>	
<b>UNDERWRITING DEDUCTIONS</b>				
Net loss and loss expenses	4,012	3,720	292	8%
Commission expenses	2,865	3,008	(143)	-5%
General and administrative expenses	(106)	154	(260)	-169%
<b>Total underwriting deductions</b>	<b>6,771</b>	<b>6,882</b>	<b>(111)</b>	
<b>UNDERWRITING INCOME</b>	<b>(119)</b>	<b>(285)</b>	<b>166</b>	

The Net premiums earned by the Malta operations increased to £6.05 million for the year ended March 31, 2020, compared to £5.98 million for the year ended March 31, 2019, an increase of £0.70 million or 1%. The Malta operations had an underwriting loss of £119,000 for the year ended March 31, 2020 compared to a loss of £285,000 for the year ended March 31, 2019.

### 1.3 Investment Performance

#### 1.3.1 Investment Statement

The Company's investment portfolio is designed to ensure funds are readily available to satisfy our obligation to policyholders and to enhance shareholder value by generating appropriate long-term risk-adjusted yields.

As can be seen from the charts below, 92% of the Company's investments are fixed income bonds of which 96% are investment grade.

The portfolio's weighted average fixed income credit quality is A, and its weighted average duration is 2.3 years.

The total consolidated investment income for the fiscal year ended March 31, 2020, was a loss of £553,000, a decrease of £774,000 from the profit of £221,000 for the year ending March 31, 2019.

The table below provides a breakdown of the Company's investment portfolio by asset class along with the total returns generated for the years ended March 31, 2020 and March 31, 2019. Of this, £362,000 was recognised through the income statement, while unrealised loss of £915,000 were recorded in other comprehensive income (OCI).

£000	2020				2019			
	Asset Balance	Net Investment Income	OCI	Total Return	Asset Balance	Net Investment Income	OCI	Total Return
Fixed Income	14,481	190	(602)	(412)	10,639	67	22	89
Equities	1,231	129	(313)	(184)	1,671	59	45	104
Other*	-	43	-	43	-	28	-	28
<b>Total</b>	<b>15,712</b>	<b>362</b>	<b>(915)</b>	<b>(553)</b>	<b>12,310</b>	<b>154</b>	<b>67</b>	<b>221</b>

\* Other includes bank interest income and other charges.

The table below provides a breakdown of (loss)/income generated under each asset class:

£000	2020					2019				
	Net Interest Income	Realised Gains	Unrealised Movement Via P&L	Unrealised Movement Via OCI	Total Return	Net Interest Income	Realised Gains	Unrealised Movement Via P&L	Unrealised Movement Via OCI	Total Return
Fixed Income	68	-	123	(602)	(411)	56	-	11	22	89
Equities	26	367	(264)	(313)	(184)	95	199	(235)	45	104
<b>Total</b>	<b>94</b>	<b>367</b>	<b>(141)</b>	<b>(915)</b>	<b>(595)</b>	<b>151</b>	<b>199</b>	<b>(224)</b>	<b>67</b>	<b>193</b>

During the year ended March 31, 2020, the Company's fixed income assets generated a total loss of £411,000. This compares to a profit of £89,000 for the year ending March 31, 2019.

During the year ended March 31, 2020, the Company's equity investments generated a total loss of £184,000. This compares to a total profit of £104,000 for the year ending March 31, 2019.

## 2 PERFORMANCE OF OTHER ACTIVITIES

There have been no other significant activities undertaken by the Company other than its insurance and related activities.

## 3 GOVERNANCE STRUCTURE

### 3.1 Governance Arrangements

The Company's Board has responsibility for strategic oversight and for ensuring that Management complies with legal and regulatory requirements. The Board of Directors adhere to the Terms of Reference, which details each director's statutory and fiduciary duties under Gibraltar law.

Management is responsible for the day-to-day operations and administration of the Company.

The Group committees used to manage the Company are as follows:

- Audit Committee
- Risk Committee
- People, Compensation and Governance Committee
- Executive Risk Management Committee
  - Operational Risk sub-committee
  - Data Privacy and Information Risk sub-committee
  - Underwriting and Claims Risk sub-committee
  - Capital and Regulatory sub-committee

The Company's Board approves Company-specific versions of the relevant risk management policies, processes and standards of conduct of the Group, given the particular nature, scale and complexity of the Company's risks.

#### The Company's Board of Directors

Keith Abercromby	<i>Non-Executive Director and Chairman</i>
Alison Hill	<i>Executive Director</i>
Tyrone Montovio	<i>Executive Director</i>
Sheila Nicoll	<i>Non-Executive Director</i>
Peter Burnim	<i>Non-Executive Director</i>
Michael Oliver	<i>Independent Non-Executive Director</i>

Management is responsible for managing and coordinating the relationship between the Company and the Group's risk management, compliance, internal audit and actuarial functions. Members of the Company's Board represent AICEL's interests at the Group's Audit and Risk Committees.

There have been no material changes in the System of Governance during the year.

#### Audit Committee

The Audit Committee is tasked with assisting the Group Board of Directors in fulfilling its oversight responsibilities for the Company's financial reporting process, the system of internal control, the audit process, as well as the Company's process for monitoring compliance with laws and regulations and the code of conduct.

#### Risk Committee

The Risk Committee is tasked with assisting the Group Board of Directors in fulfilling its oversight responsibilities for the Company's risk management, assets liability management, and financial investments (the latter as defined in the Group's Investment Policy), as well as the Company's process for monitoring overall compliance with those matters.

#### People, Compensation and Governance Committee

Our compensation programme is a key component of our talent management strategy and incentivises forward-looking activities that generates long-term sustainable value. The Company's remuneration packages offered to staff are designed to attract, retain and motivate high quality employees. Both fixed

and variable remuneration is offered. Fixed remuneration is given in the form of a base salary and is determined taking into account an individual's experience and qualifications.

A small number of sales staff receive commissions based on sales achieved. Variable remuneration is discretionary and takes the form of a cash bonus and is available to all staff. Three factors that impact the variable remuneration are market position, individual performance and the Group's ability to meet its financial and strategic targets. The granting of restricted Group stock is at the discretion of the People, Compensation and Governance Committee of the Group Board of Directors. When determining stock distributions, consideration is given to further enhance the Group's ability to retain the services of key employees.

Comprehensive salary reviews are conducted as part of the annual performance appraisal process. The Human Resource department ensures that remuneration is internally equitable and aligned with market-competitive compensation levels.

The People, Compensation and Governance Committee of the Group Board of Directors is empowered to review and approve key compensation policies on behalf of the Group and to ensure that such policies provide total compensation which is competitive in the marketplace. The role of the People, Compensation and Governance Committee is the annual review and approval of the Company's remuneration and compensation policies. This includes the executive total compensation plan structure, short-term incentive compensation plans, review of performance evaluations and equity-based plans to the Company's executive officers and other designated senior officers. Additionally, the Committee is charged with oversight of plans for the Chief Executive Officer (CEO) and senior officers' development and succession.

The Company has not established a separate Remuneration Committee and therefore maintains a Remuneration Policy which is set by and similar to that of the Group. The Company has four Independent Non-Executive Directors who receive a fixed fee which has no variable or performance-related elements. The remaining Executive Directors are employees of the Company or from the Group and are therefore remunerated based on their employment contract. The Executive Directors receive no additional remuneration or share options based upon their role as Directors.

During the year the Company did not pay a dividend to the Group (£nil paid in 2019) but management fees have been paid in the amount of £350,000. There were no other material transactions with shareholders.

### **3.2 Fit & Proper**

The Board ensures that persons who effectively run the Company or have other key functions are "fit" and take account of the respective duties allocated to individual persons to ensure appropriate diversity of qualifications, knowledge and relevant experience so that the Company is managed and overseen in a professional manner.

The Board has not established a stand-alone People, Compensation and Governance Committee for this purpose. All candidates for election as non-executive directors are determined by the People, Compensation and Governance Committee of the Group. When evaluating existing non-executive directors for re-election, the following non-exhaustive list of criteria is used. Individuals to be considered for board membership should possess all of the following personal characteristics pursuant to various specific Group and Company Policies governing directors' eligibility criteria and directors' terms of reference, based upon the Solvency II Directive and other statutory requirements: good character and integrity, informed judgment, financial literacy, maturity and a history of achievement in a business environment. Consideration is also given to the combination of skills, experience, independence and diversity of backgrounds, which will enable the Board, as a body, to be effective in advancing the business and prospects of the Company.

The Board as a whole should have demonstrated abilities in the following fields: accounting, financial and actuarial analysis; business judgement; general management; local and international insurance and reinsur-

ance, including knowledge of the Company's businesses and products; familiarity with the Gibraltar economy and its political and social situation; familiarity with the Gibraltar regulatory framework and requirements.

Members of the Board and sub-committees and those carrying out other significant functions have extensive knowledge and experience across a variety of areas. This ensures that there is an appropriate spread of skills for managing the business leadership and vision.

Below are brief biographies of the Company's Board and local management team.

**Chairman and Non-executive Director - Keith W. Abercromby, BSc FIA**

*Non-Executive Director of Canada Life Limited and of Leek United Building Society*

Mr. Abercromby has been a member of the Argus Group Holdings Limited's Board of Directors since November 2017 and is the Chairman of the Audit Committee. He was appointed as Chairman of Argus Insurance Company (Europe) Limited in November 2019. Mr. Abercromby is a non-executive director of Canada Life Limited and of Leek United Building Society where he is also Chairman of the Audit Committee. He has extensive board experience of regulated financial services companies in life assurance, general insurance, pensions and banking having occupied roles as CEO (Halifax Financial Services) and Finance Director (Castle Trust Capital Plc, HBoS Insurance & Investment Division, Norwich Union Life and Liverpool Victoria FS). He is a Fellow of the Institute of Actuaries.

**Non-executive Director - Sheila E. Nicoll, FCI**

*Chief Operating Officer, Sirius Bermuda Insurance Company, Limited*

Ms. Nicoll has been a member of the Argus Group Holdings Limited's Board of Directors since 2005, and Chairman since 2008. Ms. Nicoll has over 40 years of experience in the insurance/reinsurance industry in Bermuda, London and New York. She holds an MA in Chemistry from Oxford University and professional designations as a Fellow of the Chartered Institute of Insurance.

**Director - Alison S. Hill, FCMA, CGMA**

*Chief Executive Officer, Argus Group Holdings Limited*

Ms. Hill has been a member of the Argus Group Holdings Limited's Board of Directors since 2011. Ms. Hill has over 30 years of experience in the financial services sector, including 20 years of senior management experience in the financial services sector in Europe, prior to joining Argus Group Holdings Limited as Chief Operations Officer in 2009. She succeeded to Chief Executive Officer in 2011. She holds a BA (Hons) in Business Studies from Plymouth University and professional designations as a Fellow Chartered Management Accountant and Chartered Global Management Accountant. She serves as director on several other Boards.

**Director - Tyrone Montovio, Cert Mgmt (open) CMgr FCMI ACII Chartered Insurer**

*Chief Executive, Argus Insurance Company (Europe) Limited*

Mr. Montovio joined Norwich Union International in 1996. In 2005 following the acquisition of Norwich Union International in Gibraltar, he was appointed as European Underwriting and Reinsurance Manager as well as Chief Executive of the Broking subsidiary, being responsible for the underwriting, broking and reinsurance for the company.

He was promoted in 2012 to European General Manager with overall responsibility for the Argus Group's operations in Gibraltar, including the Broking subsidiary, as well providing technical underwriting and reinsurance support to our Maltese operations.

In October 2017 he achieved Chartered Manager status and Fellowship of the Chartered Management Institute.

Mr. Montovio is now Chief Executive of Argus Insurance Company (Europe) Limited with overall responsibility for the management and direction of the Argus Group's operations in Gibraltar and Malta.

**Non-executive Director - Peter R. Burnim, MBA**

*MBA : Chairman and Board member of various companies*

Mr. Burnim has been a member of the Argus Group Holdings Limited Board of Directors for 10 years. He currently serves as a Trustee of Allianz VIP Trust and Allianz VIP Fund of Fund Trust, Chairman of EGB Insurance, Emrys Technology, Sterling Bank & Trust Limited, and on the Board of Sterling Trust (Cayman) Limited and Turing Motor Company. He is founder and director of Stellar Energy Foundation. He serves on numerous education, artistic, and religious not-for-profit Boards. He previously worked for Citibank/Citicorp for over 25 years in the USA and Europe, where he served as Senior Credit, Senior Securities and Senior Corporate Officer, running U.S. Corporate Banking, European Corporate Finance, European Capital Markets and U.S. Private Banking. Mr. Burnim is an honors graduate of Harvard College and Harvard Business School.

**Non-executive Director - Michael Oliver, FCII**

*Director of Gippeswyk Consulting Ltd*

Mr. Oliver is a Fellow of the Chartered Insurance Institute and a Distinguished Fellow of the International Association of Insurance Supervisors (IAIS). He entered the general insurance industry in 1973 with the Guardian Royal Exchange Group, holding underwriting and senior management positions in its UK and U.S. operations. From 1998, he worked for insurance regulators in the UK, Caribbean and Gibraltar and was a member of the Executive Committee of the IAIS from 2011 to 2014. Mr. Oliver now runs his own insurance and regulatory consulting company in Gibraltar and is a director of a number of Gibraltar insurers.

**Oksana Duyunova, FCCA**

*European Finance Manager*

Ms. Duyunova joined the Company in October 2018. She has over 15 years' experience in the accounting field with over 10 years' experience in the Financial Services sector. Prior to joining the Company, Ms. Duyunova worked in Tradewise Insurance Company Limited as a Financial Controller, Nature Group Plc as a Group Financial Controller and BDO Limited as an Audit semi-senior.

Ms. Duyunova is a Fellow of the Association of Chartered Certified Accountants.

**Alex Bonavia, ACII, Chartered Insurer, Cert PFS**

*Commercial and Business Development Manager*

Mr. Bonavia has over 20 years' experience in the Financial Services Industry in Gibraltar as a Financial Adviser of the only overseas branch of a UK Building Society's and later as an International Financial Manager of the European office of one of the UK top 4 banks. The latter role consisted of advising high net worth clients all over Europe for their banking and investment needs.

In March 2012, he joined Argus group and indeed the General Insurance Industry as Head of Broking leading the Broking arm in Gibraltar. His role has changed significantly in the last few years taking over a business development role with AICEL. Alex oversees the underwriting functions in Gibraltar and provides technical support for the operation in Malta. Furthermore, Mr. Bonavia acts as the liaison for AICEL brokers and business introducers.

**James Skelton**

*European Claims Manager*

Mr. Skelton joined the company in January 2019 from Advantage Insurance where he held the position of Head of Technical Claims. Mr. Skelton has over 22 years of claims experience involving Catastrophic loss handling, reinsurance reporting, supply chain management as well as technical referrals for Fraud and analysis of overall claims processes.

Prior to moving to Gibraltar Mr. Skelton was Technical Claims Manager at One Commercial as well as holding positions at AIG, NFU Mutual and James Chapman & Co Solicitors.

**Kathleen Wilkes**, Chartered MCIPD, ICA  
*Operations Manager*

Ms. Wilkes has over 25 years' experience in the HR field in the UK and Gibraltar where she has worked in a range of sectors including financial services, manufacturing and pharmaceutical. Ms. Wilkes became a Chartered member of the Chartered Institute of Personnel and Development in 2011 and is currently Chair of the Gibraltar CIPD branch. She joined Argus Insurance in 2015 and led on the project to obtain Corporate Chartered Insurers status for the company in 2016. Ms. Wilkes holds the International Compliance Association Advanced Certificate in Compliance.

**Pilar Rodriguez-Arias**  
*European Risk and Compliance Manager*

Ms. Rodriguez-Arias has over 15 years' experience in the Insurance industry. Prior to joining Argus in October 2019, Ms. Rodriguez-Arias worked in Swiss Re, where she held roles as Head of Financial Planning and Analysis Europe, Middle East and Africa (Corporate Solutions) and Senior Operational Risk Manager.

She holds a BA (Hons) in Actuarial and Financial Sciences and is a fellow of the Official Association of Spanish Actuaries (Instituto de Actuarios Españoles - Colegio Profesional).

### **3.3 Risk Management System and ORSA**

#### **3.3.1 Risk Management System**

The Board is ultimately responsible for ensuring the effectiveness of the risk management system, setting the Company's risk appetite and overall risk tolerance limits, as well as providing the main risk management strategies and policies.

Material risks addressed by the risk management system include the following:

- Underwriting risk
- Market risk
- Credit risk
- Liquidity risk
- Operational risk

The Board has established a Risk Management Policy, as well as appointed a European Risk Manager whose responsibilities include:

- Ensuring the effective operation of the risk management system;
- Monitoring the risk management system;
- Monitoring the general risk profile of the Company;
- Reporting on risk exposures and advising Management and the Board on risk management matters,

The European Risk Manager reports to the Group Risk Management monthly and to the Board on a quarterly basis.

#### **3.3.1.1 Risk Management Strategies, Objectives, Processes and Reporting**

The Company aims to ensure that all material risks are considered when managing the business. The ultimate goal is to ensure policyholder protection and to enable the Company to achieve its overall strategic objectives, while maintaining regulatory compliance. The processes in place are intended to identify all material risks, minimise risks wherever possible and manage and control all significant risks within acceptable limits.

The Company has developed a Risk Appetite Statement, which provides a guide to management for the consideration of risk when managing the business. The statement includes the Company's:

- Risk Strategy;
- Risk Preferences; and
- Risk Tolerances.

The actions and policies implemented to meet strategic objectives and regulatory obligations form the core of the risk management framework. The Company's systems, processes and controls are considered proportionate and appropriate to the nature, scale and complexity of the Company's risks and operations.

### **3.3.1.2 Identification, Measurement, Monitoring, Management and Reporting of Risks**

The Company ensures that the risk management system and solvency assessment systems are embedded in the running of its business through the Argus Group's quarterly Executive Risk Management Committee, and monthly sub-committees that encompass the Company's specific risks. The Executive Risk Management Committee has four sub-committees being the Operational Risk Committee, the Data Privacy and Information Risk Committee, the Underwriting and Claims Committee and the Capital and Regulatory Committee. All material risks, business decisions and strategic planning are brought to these committees/working groups, and reported to the Committees of the Board for review and approval. Business decisions are assessed taking into consideration the risks and the Company's appetite towards risk, as defined in the Risk Management Policy. Solvency assessment is carried out on a forward-looking basis at least quarterly. The impact on solvency and capital from potential material business decisions is incorporated in the Medium-Term Capital Plan and reported to the Capital and Regulatory Committee, which is a sub-committee to the Executive Risk Management Committee, and the Company's Board.

The Risk Register is a key input into the risk management framework, and any material changes in the underlying risks will be modelled for potential impact on the Company's capital requirements. Such changes include, but are not limited to, changes in business mix, strategy and investment.

The controls identified in the Risk Register to monitor, mitigate and control the risks facing the Company are reviewed for continued relevance and documented. Compliance with the components of the controls is verified via the ongoing management reviews and Internal Audit reviews. Any significant issues are reported to the Company's Board.

### **3.3.1.3 Implementation of Risk Management Function**

The risk assessment exercise takes place annually in conjunction with the annual business planning and strategy review cycle. The identified risks, together with risk measurement and mitigation control respectively, are recorded in the risk registers for the Company. The risk identification process takes into consideration all material risks identified and included in the Solvency II Directive. To that end, the Risk Management function has developed Risk Assessment Guidelines and Risk Register Templates that are used by the Company. Risk Registers are reviewed and challenged by the Executive Risk Management Committee and the Company's Board. A report on how high risk areas are being managed is submitted to the Group's Risk Committee bi-annually.

## **3.3.2 Own Risk and Solvency Assessment**

### **3.3.2.1 ORSA Process and Integration**

The Company has established a policy setting out the requirement to carry out an Own Risk and Solvency Assessment (ORSA). The purpose of the policy is to ensure that all material risks faced by the Company are appropriately assessed and the level of capital required in managing these risks, or other risk mit-

igation measures, are determined and put in place. The ORSA provides the Board and Management with a thorough understanding of the Company's risk profile and provides the information needed to make appropriate decisions.

The Company produces an ORSA at least annually incorporating the output from the annual business planning process. Additional ORSAs may be produced in response to material changes to the Company's risk profile.

The ORSA is produced by Management in conjunction with the Actuarial and Risk functions. The ORSA report is discussed and challenged by the Company's Board. The Company's Board maintains oversight, ensuring that the ORSA takes account of the Company's material risks and is aligned with the Board's strategy for the business.

The ORSA approval process includes independent verification by Internal Audit, comment, review and approval by the Executive Risk Management Committee, and final approval by the Company's Board.

### ***3.3.2.2 Relationship between Solvency Needs, Risk Profile, Capital Management and Risk Management***

The ORSA enables the Board to assess the Company's capital needs over the planning horizon. The ORSA is carried out taking due account of Company's specific risk profile. This includes risks explicitly captured in the Standard Formula, as well as risks which are either not captured or not able to be mitigated through capital. All material risks are taken into account in the ORSA process.

The ORSA process operates continuously throughout the year, with consideration being given as to whether any decisions, events, issues, market factors or similar are likely to impact the Company's risk profile, appetite, free reserves, or other relevant matters. In such a case, the impact on the Company's own assessment of its capital needs will be considered and, if required, a further ORSA, together with the SCR calculation, will be carried out. This ensures that the Company's existing and forecast capital position and risk profile are properly taken into account in any strategic decisions.

The Company's capital management policy has been established to ensure that the Company has in place the appropriate levels and quality of capital as required by both the SCR calculation and as determined by the ORSA. The policy aims to ensure that appropriate plans are in place to enable the Company to meet its capital requirements both in the immediate and the medium-term and that all items of own funds comply with the relevant rules, regulations and legislation.

Management considers the capital requirements of the Company on a quarterly basis, and advises the Executive Risk Management Committee, through the Medium-Term Capital Plan, of any surplus or deficit capital.

The Company prepares a quarterly Medium-Term Capital Plan outlining the actions to be taken for the subsequent year, and further into the future as appropriate. These actions are based on:

- The adequacy of capital held as at the quarter end date;
- A forecast of business performance;
- The impact of distributing surplus capital; and
- Other business decisions in line with the Company's strategic goals.

The Medium-Term Capital Plan ensures that the Company is sufficiently capitalised to meet all statutory and regulatory requirements. The Company currently meets its regulatory capital requirement.

### 3.4 Internal Control System

The Board has established a system of internal controls comprised of internal control environment, monitoring and reporting mechanisms to ensure that business objectives are achieved in an effective and efficient manner; and that reliable financial information is produced for the decision-making process.

The adherence to internal policies and procedures is an integral part of the business culture. Senior management of the Company ensures that the internal control system and control activities are commensurate with the risks arising and that all personnel are aware of their role and responsibilities.

#### Monitoring and Reporting

The Board has established the Compliance function, which is responsible for the ongoing monitoring and reporting on the adherence to the internal control system. The compliance officer reports to the Executive Risk Management Committee via the Operational Risk sub-committee monthly, and to the Board quarterly.

#### 3.4.1 Compliance Function

The Compliance function is managed by a Compliance Officer appointed by the Board whose primary responsibilities include:

- Establishment and implementation of the Company's compliance programme.
- Ensuring that all personnel are aware of their role in the Company's internal control system.
- Monitoring and reporting on compliance with policies and procedures, applicable laws and regulations, as well as Board approved standard of business conduct policy.
- Monitoring regulatory changes and advise Management and the Board where such changes have implications for the Company's regulatory compliance risk.
- Advising Management and the Board on compliance issues pertaining to:
  - a) Corporate Governance;
  - b) The prevention of money laundering and combating of terrorist financing;
  - c) Know Your Customer and Due Diligence process;
  - d) Data privacy and protection; and
  - e) Customer complaints.

Non-compliance incidents are dealt with swiftly in proportion to the severity of the incident. The Compliance Officer reports to the Board on a quarterly basis.

### 3.5 Internal Audit

The Internal Audit function is currently outsourced to the Group and is managed by the Head of Group Internal Audit Function who conducts independent audits and reports to the Board of the Company on a quarterly basis.

The Company has developed a Board-approved Internal Audit policy that covers the terms and conditions according to which the Internal Audit function can be called upon to give its opinion or assistance and to carry out other special tasks.

The Group Internal Audit has developed and implemented a Board-approved audit plan that sets out the following:

- The audit work to be undertaken during each fiscal year, taking into account strategic business objectives, the complete system of governance and the relevant regulatory requirements;
- A risk-based approach in deciding its priorities focusing on the areas of greatest risk to the business;
- Assessment and adherence to the effectiveness of internal systems and controls, procedures and policies;

- Appropriate and effective action is taken by Management on significant findings; and
- The timing and submission of the internal audit report to the Board.

Where necessary, the Group Internal Auditor may carry out audits and/or special investigations as requested by Senior Executives and the Board.

### 3.6 Actuarial

The Company's Actuarial Function is outsourced to the Group's Actuarial function. The Actuarial function holder is the Group's Chief Strategy and Capital Officer. The Actuarial function is governed by Terms of Reference, which encompasses the requirements of the Solvency II Directive, and has been approved by the Board.

The Company's Actuarial function is responsible for the following key areas:

- Overseeing and validating the calculation of technical provisions;
- Calculating the Company's Solvency Capital Requirement
- Opining on the adequacy of reinsurance arrangements;
- Opining on the overall underwriting policy; and
- Contributing to the Company's risk management system.

The Company engages an external actuarial firm to carry out the independent reserve reviews under the oversight of the Actuarial function holder, and ultimately the Board. The Actuarial function holder is responsible for providing a recommendation to Management regarding the adequacy of the reserves. The Actuarial function holder reports at least annually to the Board on the nature, reliability and adequacy of the Company's reserves for insurance liabilities.

The Actuarial function contributes to the effectiveness of the risk management framework, particularly as it relates to policyholder obligations, potential exposures and capital requirements. Analyses performed by the Actuarial function include but are not limited to:

- Own risk and solvency self-assessment at least annually (ORSA);
- Asset liability matching quarterly;
- Experience analyses at least annually;
- Effectiveness of underwriting processes;
- Effectiveness/appropriateness of reinsurance arrangements; and
- Product profitability, business performance.

The Actuarial function reports on its activities via the relevant executive management committees and committees of the Board.

### 3.7 Outsourcing

The Company has developed a Board-approved Outsourcing Policy that governs the outsourcing arrangements, thereby ensuring that outsourced functions are conducted in a sound manner, in compliance with applicable laws and regulations and ensuring that the Company meets its financial and service obligations to policyholders.

The policy sets out a robust governance process to follow when selecting a Third Party Service Provider (TPSP). Prior to the appointment of any TPSP, a full due diligence exercise is undertaken to assess the suitability, competency and capability of each TPSP to carry out the outsourced function and the control environment in which it operates. Part of the control environment assessment is to ensure that the TPSP has sufficient data security controls in place to protect the Company data and that of its policyholders, as well as having the appropriate business continuity plans.

The policy further sets out a process to monitor the performance of each outsourced function or service and to report to the Company all instances of non-compliance with the policy or breach of laws and regulations in a timely manner.

Approximately half of the Company's business is distributed through Insurance Intermediaries. Only one Insurance intermediary has a binding authority to write premium and manage minor claims within the terms of the Service Level Agreement with the Company.

#### Outsourcing Providers by Location:

The table below shows important operational functions which are outsourced by the Company and the location of that service providers' operations.

Third Party Outsourced Service Description	Location
Binding Authority and Minor Claims Handling	Gibraltar
Claims handling services	Spain/Gibraltar/Malta
Actuarial Review	Ireland
IT Support	Gibraltar
Internal Audit Field Work	Gibraltar/Malta
Investment Management	UK
Underwriting	Malta

Intra-Group Outsourced Service	Location
Actuarial Function	Bermuda
Internal Audit	Bermuda
IT Infrastructure	Bermuda
Investment Function	Bermuda

### 3.8 Adequacy of System of Governance

The Company aims to continuously improve its compliance and governance systems by ensuring that they are reviewed, evaluated, and recommendations are made to the Board regarding enhancing and developing systems. The Company also considers relevant industry advice and guidelines from bodies such as the Gibraltar Insurance Association (GIA). New processes are implemented where appropriate and relevant for the size and complexity of the Company. Internal audits and external audits provide independent evaluation of the Company's systems of governance. Recommendations from these audits are considered by the Board and implemented proportionate to the business' risks.

### 3.9 Any other Material Information

There is no other Material Information as at March 31, 2020.

## 4 RISK PROFILE

To facilitate effective business operations and to maintain consistency in its risk management process of risk identification, measurement, management, monitoring and reporting, the Company has identified material risks to which its general insurance product offerings are exposed. For each material risk, the Company has described the various mitigation controls and risk treatment to minimise or reduce the risk exposure arising.

The category of the material risks to which the company is exposed include the following:

- Underwriting risk
- Market risk
  - Currency risk
  - Interest rate risk
  - Equity price risk
- Credit risk
- Concentration of credit risk
- Liquidity risk
- Operational risk

### 4.1 Underwriting Risk

Underwriting risk can arise from inadequate pricing or risk selection, inappropriate reserving, or other fluctuations in the frequency and severity of insured events.

The Company manages underwriting risk through regular reviews of the performance of our book of business including loss ratio, claims frequency, claims costs and premiums. This is linked to a continuous feedback cycle of reserving and claims development. Risks are recorded on the Company's Risk Register and reviewed on an annual basis.

The Company distributes on a direct basis and via a network of carefully selected intermediaries in a but fairly stable market.

Claims are handled in-house initially, while larger or more complex claims may be outsourced to selected third party handlers. Reserving practices and approach are set by the Company based on local market experience and results arising from external actuarial reviews.

#### Material Risk Concentrations

The Company underwrites a variety of classes of insurance so the portfolio is not restricted to one particular product. The Company does however, rely on a number of key intermediaries for its business so these relationships are monitored closely.

#### Risk Mitigations

The Company mitigates underwriting risk through the purchase of reinsurance protection and implementation of appropriate controls. Reinsurance is placed with counterparties that have a strong credit rating. Reinsurers are selected on the strength of financial ratings A- or higher as measured by Standard and Poor or A. M. Best. Management regularly monitors and performs an assessment of creditworthiness of reinsurers.

In addition, the Company further monitors underwriting risk through the Underwriting and Claims Risk sub-committee.

## 4.2 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of changes in market factors. Market factors include three types of risk: currency risk, interest rate risk and equity risk.

### 4.2.1 Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Company's principal transactions are carried out in Sterling and Euros and its exposure to foreign exchange risk arises primarily with respect to Euros from the Malta business. The Company's practice is to ensure that all Euro-denominated liabilities are matched with Euro-denominated assets, thus mitigating currency exposure.

### 4.2.2 Interest Rate Risk

Interest rate risk is the potential for financial loss arising from changes in interest rates. Change in market interest rates can impact the reinvestment of matured investments, as the returns available on the new investment may be significantly different from the returns previously achieved. The Company manages these risks through:

- Asset allocation and diversification of the investment portfolio;
- Investing in fixed income assets that closely match the liability product cash flows for products with fixed and highly predictable benefit payments; and
- Quantifying and reviewing regularly the risk associated with the mismatch in portfolio duration and cash flow.

### 4.2.3 Equity Price Risk

Equity price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

The Company manages equity price risk by setting and monitoring the objectives and constraints on investments, diversification plans, and the limits on investments in each country, sector and market.

The Company has no significant concentration of equity price risk.

## 4.3 Credit Risk

### 4.3.1 Maximum Exposure to Credit Risk

The Company manages credit risk by applying diversification requirements, such as investing by asset class, geography and industry. The Company conducts regular reviews of credit quality ratings of its investments and conducts active credit risk governance, including independent monitoring and review, and reporting to management and the Group's Board.

### 4.3.2 Concentration of Credit Risk

Concentrations of credit risk arise from exposures to a single debtor, a group of related debtors or groups of debtors that have similar credit risk characteristics in that they operate in the same geographic region or in similar industries. The characteristics are similar in that changes in economic or political environments may impact their ability to meet obligations as they come due. Aged receivables are monitored and reviewed on a quarterly basis; any significant aggregation is brought to the attention of the management. Similarly, reinsurance concentration limits are in place and reinsurance recoverables are monitored on a regular basis.

#### 4.4 Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet all cash outflow obligations as they come due. The Company's asset-liability management process allows it to maintain its financial position by ensuring that sufficient liquid assets are available to cover its potential liability funding requirements. The Company invests in various types of assets with a view to matching them with its liabilities of various durations. To strengthen its liquidity further, the Company actively manages and monitors its capital and asset levels, diversification and credit quality of its investments, cash forecasts and actual amounts against established targets.

The short-term (less than one year) liquidity needs are more than adequately met by maturing bonds, the sale of equities, as well as by current operating cash flows. Longer duration cash flows are also backed by a broader range of asset classes including equity and other non-fixed income assets.

Based on the Company's historical cash flows and current financial performance, Management believes that the cash flow from the Company's operating activities will continue to provide sufficient liquidity for the Company to satisfy insurance liability and debt service obligations and to pay other expenses as they fall due.

For insurance contract liabilities, maturity profiles are determined based on estimated timing of net cash outflows from the recognised insurance liabilities.

#### 4.5 Operational Risk

Operational risk is defined as the risk of financial loss, reputational or brand damage, resulting from inadequate or failed internal processes, people, systems or from external events, including legal and compliance risk.

The Company has developed a Board-approved Operational Risk Management Policy, as well as Operational Risk Management procedures, which cover the following areas:

- Identification of material operational risks to which the Company is, or might be, exposed and assessment of how to mitigate these risks;
- Activities and internal processes for managing operational risks, including the IT system;
- Definition of risk tolerance limits with regard to operational risk; and
- A process to identify, record and analyse the causes of operational risk events resulting from control breakdowns or non-compliance with Operating Policies and Procedures, as well as customer complaints.

The Company has established the following controls to mitigate operational risk:

- Four-eyes processes for review and analysis;
- Information systems controls, as well as physical controls to ensure the integrity and protection of the Company and customer's data is adequate;
- Employees training and awareness of the various cyber risks/threats and how to guard against them;
- Monthly reporting of operational risk events, including customer complaints to the Operational Risk Sub-Committee and significant issues arising to the Board on a quarterly basis; and
- Disaster Recovery and Business Continuity plans.

#### 4.6 Other Material Risk Exposures

A risk register of significant risks is maintained by local management and is reviewed by the Executive Risk Management Committee. Geopolitical Risk arising from Brexit remains a material risk for the Company. Gibraltar is a member of the EU through its relationship as a British Overseas Territory. In June of 2016, the UK majority voted to leave the EU in the EU referendum. A Withdrawal Agreement was signed on January 24, 2020 and a transition period set, which lasts until December 31, 2020.

Risks faced by the Company include the inability to passport into EU jurisdictions from Gibraltar, which will affect the Company's subsidiary in Malta, and potentially the freedom of movement of people, particularly from Spain. These changes could lead to a change in the mix and volumes of business. The Company performs scenario tests related to these risks as part of the ORSA process.

The Board continues to monitor the developments, and the Company is developing strategies in response to the potential outcomes, including application for third country branch license in Malta. For the time being, the mix and volumes of business have not been affected.

## **5 ASSETS - INFORMATION ON AGGREGATION BY CLASS**

The valuation methods used are based on International Accounting Standards, as used in the Company's financial statements. Any variations in valuation are detailed in Section 6.

## 6 CONTENT BY MATERIAL CLASSES OF ASSETS AND LIABILITIES OTHER THAN TECHNICAL PROVISIONS

The following table shows the differences between the Solvency II valuations of asset classes and those in the Company's Statutory Financial Statements; explanations are provided:

Assets	Solvency II Value £000	IFRS value £000	Variance £000	Comments
Deferred acquisition costs	-	1,877	(1,877)	DAC valued at zero under Solvency II
Deferred tax assets	163	-	163	Tax impact of difference on Net Assets
Property, plant & equipment held for own use	679	718	(39)	PPE valued using market value basis for Solvency II
Holdings in related undertakings	1,743	2,405	(662)	Subsidiary valued using Net Equity Method under Solvency II
Equities – listed	1,231	1,232	(1)	Accrued dividends not included under Solvency II
Government Bonds	5,515	5,515	-	
Corporate Bonds	9,129	9,129	-	
Reinsurance recoverables: Non-life excluding health	9,192	10,784	(1,592)	See Section 7 for details
Reinsurance recoverables: Health similar to non-life	(2)	-	(2)	See Section 7 for details
Insurance intermediaries receivables	1,347	3,645	(2,298)	Receivables that are not overdue form part of the future cash flows reported within provisions for Solvency II
Reinsurance receivables	639	-	639	Receivables that are not overdue form part of the future cash flows reported within provisions for Solvency II
Receivables (trade, not insurance)	142	286	(144)	Prepayments are valued zero under Solvency II
Cash and cash equivalents	6,346	6,346	(-)	
<b>Total assets</b>	<b>36,125</b>	<b>41,936</b>	<b>(5,812)</b>	

## 7 VALUATION OF TECHNICAL PROVISIONS

Technical provisions represent the insurance liabilities as of the reporting date. The Technical provisions comprise of the Best Estimate of Liabilities (BEL) and a risk margin determined in accordance with the Solvency II Directive, Articles 75 to 86.

A summary of the technical provisions for the Company as at March 31, 2020 is set out in the following table:

£000	Net BEL	Risk Margin	Net Solvency II Technical Provisions
<b>Best Estimate Liabilities</b>			
Motor Liability	6,183	413	6,596
Motor Other	2,759	184	2,943
General Liability	2,673	179	2,852
Property	(113)	0	(113)
Marine	80	5	85
Income Protection	198	13	211
<b>Solvency II Technical Provisions</b>	<b>11,780</b>	<b>794</b>	<b>12,574</b>

### Actuarial Methodologies and Assumptions

The BEL is comprised of two components, the claims provision and the premium provision. The claims provision represents the liability for the unpaid portion of the claims that have occurred as of the valuation date. The premium provision represents the present value of the expected cash flows on the unexpired portion of all in-force policies, and policies to which the Company is contractually bound that have yet to incept. These are commonly referred to as Bound But Not Incepted Exposures (BBNI).

The starting point for deriving the BEL is the Company's unpaid claims liabilities on an IFRS basis. Traditional actuarial techniques are used, such as the Paid and Reported Loss Development methods, the Bornhuetter-Ferguson method, and the Case Reserve Development method. The particular method selected for a particular reserve segment is judgmentally selected based on the applicability of each method and the availability of data to support each method.

No assumptions regarding Management actions are included in the calculation of the technical provisions. Expected policyholder behaviour is captured through the expected lapse rates with respect to policies in force, or bound, but not incepted underlying the derivation of the premium provisions.

Expected lapse rates are based on the Company's average lapse experience by reserve segment.

The key differences between the Company's insurance liabilities on an IFRS basis and on a Solvency II are as follows:

- *Discounting* - Cash flows are discounted using the risk-free term structure provided by European Insurance and Occupational Pensions Authority (EIOPA).
- *Unearned Premium* - These are replaced by premium provisions, which are valued on a best estimate basis taking account of all future premium cash inflows.
- *Expenses* - Expenses include run-off expenses; ceded expenses take account of reinsurance commissions from the Company's reinsurance programmes.
- *BBNI* - The technical provisions include future premium cash flows not yet due in respect of BBNI exposures up to the relevant contract boundary.

- *Adjustment for counterparty default* - Ceded liabilities are reduced for expected reinsurer default using the probability of default applicable to the credit rating of the counterparty as specified by the EIOPA guidance.
- *Events Not in Data* (ENIDs) - There may be possible future events which are not reflected in the historical data of the Company or the market. ENIDs are typically viewed as being low frequency and high severity events, but consideration also needs to be given to the potential for favourable loss experience not in the data. An ENID loading is applied to lines of business and it applies to both the claims provisions and the premium provisions. The uplift factor is derived as the ratio of the "true mean" to the "mean only including realistically foreseeable events."

### **Allocation to Lines of Business**

Best estimates and cash flows are calculated separately for each line of business. Data used in the derivation of the BEL has been satisfactorily segmented into homogeneous risk groups, consistent with the requirements of Solvency II.

### **Reinsurance Recoverables**

The Company purchases reinsurance as part of its risk mitigation programme. Reinsurance is placed on both a proportional and non-proportional basis. The expected cash flow of ceded losses for each year is based on the difference between the expected cash flow of gross and net unpaid claims liabilities, offset by an adjustment for expected reinsurer default.

### **Risk Margin**

The risk margin has been calculated using Method 1. This method approximates the individual risks within all modules to be used for the calculation of future SCR. The future SCR is projected with this method until the BEL is fully run-off. A cost of capital rate of 6% is applied at each SCR estimate, and discounted using the yield curve provided by EIOPA to estimate the cost of capital required to support the liabilities.

### **Transitional Adjustments**

The Company has not used any transitional adjustments with regard to the matching adjustment, volatility adjustment, transitional risk free interest rate term structure or transitional deduction.

### **Material Changes**

The IFRS basis has not changed during the period.

The calculation of the risk margin continues to be performed by the Company's internal Actuarial function. The Company has consistently used the Method 1 to calculate the risk margin.

### **Level of Uncertainty**

There is inherent uncertainty in estimating the technical provisions. Uncertainty may arise from the following areas:

- Outstanding losses may ultimately settle at a higher or lower amount than estimated from known information as of the valuation date.
- Future losses on both expired and unexpired business are based on actuarial assumptions, which take account of past experience, and anticipated future changes. These assumptions may prove to differ from actual experience.
- ENIDs, by their nature are unpredictable and any allowance for ENIDs may prove to be overstated or understated.
- Expense assumptions are based on reasonable judgement reflecting past experience where appropriate. These assumptions may ultimately prove to differ from actual experience.
- Impact from unforeseen economic, legal and social trends.

The following table shows the movement from the IFRS insurance liabilities to the Solvency II technical provisions.

£000	Net
<b>IFRS Reserves</b>	<b>14,684</b>
Remove Unearned Premium Reserve	(5,649)
Expected Losses on Unexpired Risks	3,149
Expected Losses on BBNI Risks	772
Premium Receivables net of Expenses	(1,760)
ENIDs	544
Counterparty Default	3
Effect of Discounting	(7)
Risk Margin	794
Other	44
<b>Solvency II Technical Provisions</b>	<b>12,574</b>

## 8 LIABILITIES OTHER THAN TECHNICAL PROVISIONS - INFORMATION ON AGGREGATION BY CLASS

The valuation methods used are based on International Accounting Standards, as used in the Company's financial statements. Any variations in valuation are detailed in Section 9.

## 9 VALUATION OF MATERIAL PROVISIONS OTHER THAN TECHNICAL PROVISIONS AND CONTINGENT LIABILITIES

The following table shows the differences between the Solvency II valuations of liability classes and those in the Company's Statutory Accounts. Explanations have been provided.

Liabilities	Solvency II Value £000	IFRS value £000	Variance £000	Comments
Technical Provisions – Non-life: best estimate	20,774	25,468	(4,694)	See Section 7 for details
Technical Provisions – Non-life: risk margin	781	-	781	See Section 7 for details
Technical Provisions – Life: best estimate	196	-	196	See Section 7 for details
Technical Provisions – Life: risk margin	13	-	13	See Section 7 for details
Insurance and intermediaries payables	1,625	1,625	-	
Reinsurance payables	345	984	(639)	Payables that are not overdue form part of the future cash flows reported within provisions for Solvency II
Payables (trade, not insurance)	2,486	2,486	-	
<b>Total liabilities</b>	<b>26,220</b>	<b>30,563</b>	<b>(4,343)</b>	

## 10 OWN FUNDS - SOLVENCY RATIO

There were no dividend payment to Argus Group Holdings Limited during the year.

The Company manages its level of own funds by monitoring its Solvency Capital Requirement (SCR) coverage ratio, the calculation of which is detailed below.

The SCR and the Minimum Capital Requirement (MCR) for the Company as at March 31, 2020 is shown by risk module in the following table.

Risk Module	£000
Market Risk	1,487
Counterparty Risk	2,016
Health Non Similar to Life Techniques Underwriting Risk	639
Non-Life Underwriting Risk	4,239
Diversification	(2,138)
<b>Basic Solvency Capital Requirement</b>	<b>6,242</b>
Operational Risk	629
<b>Solvency Capital Requirement</b>	<b>6,872</b>
<b>Minimum Capital Requirement</b>	<b>3,187</b>

The results show that the Company is compliant with the SCR and the MCR.

### Calculation of the SCR

The Company uses the Standard Formula to determine the SCR. No simplifications have been used for any of the risk modules of the SCR, and the Company does not use any undertaking specific parameters.

No capital add-ons have been applied to the SCR figures. In addition, the Company does not use the duration-based equity risk sub-module in the calculation of the SCR.

The SCR was submitted to the regulator on September 1, 2020 and is therefore, still subject to supervisory assessment.

### Calculation of the MCR

The inputs used to calculate the MCR are shown in the following table.

LINE OF BUSINESS £000	Net Best Estimate Liabilities	Net Written Premiums in the last 12 months
Motor Liability	6,183	3,939
Motor Other	2,759	4,112
General Liability	2,673	1,881
Property	-	1,138
Marine	80	112
Income Protection	198	721
<b>Total</b>	<b>11,893</b>	<b>11,902</b>

The MCR determined per the Standard Formula is the absolute floor of £3.2 million.

## Compliance with the SCR and MCR

There has not been any non-compliance with the SCR or MCR over the financial year.

£000	2020
Solvency II minimum capital requirement (MCR)	3,187
Solvency II solvency capital requirement (SCR)	6,872
Solvency II eligible own funds	9,905
Solvency Capital Requirement Ratio	144%

## 11 OWN FUNDS - INFORMATION ON THE STRUCTURE, AMOUNTS AND ELIGIBILITY OF OWN FUNDS

All of the Company's own funds are in the form of fully paid up Share Capital.

## 12 DIFFERENCES BETWEEN THE STANDARD FORMULA AND ANY INTERNAL MODELS USED

The Company uses the Standard Formula.

## 13 APPENDICES

### ANNUAL QRTS 2020
